PAPAIN Protease

PAPAIN ENZYME

Catalyzing innovation. Development of a feed protease. Protease on performance, nutrient digestibility...

Papain Protease Enzyme:

- Increases protein digestibility through hydrolysis of storage and structural proteins, and disrupts interactions of proteins with starch and fibre in the diet.
- Additionally, they target other antinutritional factors in the diet e.g. residual trypsin inhibitors and lectins in soybean meal and some other vegetable proteins, thereby improving nutrient digestibility.

MANUFACTURER & EXPORTER OF PAPAIN ENZYME

THE ASPIRE BIOZYMES
RAMANATHAPURAM VILLAGE
AVINASHI TALUK
TIRUPPUR
MOBILE : 93459 43092
